The Sciences

Biology / Microbiology

The science of life or of the origin, structure, reproduction, growth and development of living organisms collectively.

Chemistry / Biochemistry

The science that deals with the composition, structure and properties of chemical processes and phenomena of substances and the transformation that they undergo.

Computer Science

The science that deals with the theoretical aspects of computers including storage and the transformation of data using computers.

Earth and Space Sciences

The body of sciences that include geology, mineralogy, physiography, oceanography, meteorology, climatology, astronomy, speleology, seismology, geography, etc.

Engineering

Technology. Projects that directly apply scientific principles to manufacturing and practical uses.

Mathematics

The science of numbers and their operations, interrelations, combinations, generalizations, and abstractions of spaced configurations and their structure. Development of formal logical systems or various numerical and algebraic computations and the application of these principles.

Medicine and Health

The study of diseases and health of humans and animals.

Physics

Theories, principles and laws governing energy and the effect of energy on matter.

All Sciences

If you plan on entering any of the Science categories, please visit www.ActSoNewJersey.org to download a comprehensive guide for planning, executing and presenting your project(s).

Requirements

1. Only one (1) project can be entered per area.
